The Original Radiotherapy Shielding Block Mold Cutter

Renowned as the worldwide industry standard, more Huestis Styro•formers are in use than all other shielding block mold cutters combined. Styro•former® offers accurate, easy and fast cutting with minimal training. A handheld tracing stylus allows quick radiograph outlining to provide a smooth and efficient block cutting procedure. A quick change wire system uses unique thumb screws and a table mounted measuring template for quick, easy wire changes.

Rigid box frame ensures that the cutting wire is precisely aligned between the source point and block tray.

NEW — Quick Change Wire System

Easily adjustable thumb screws and a table mounted wire measuring template facilitate quick cutting wire changes.
